Just in case the tags get messed up over the email: The following items should have the following fonts and points as stated:

Title = Segoe Print (10)

Mind = Arial Black (18)

Works = Times New Roman (18)

Gallery = Brush Script MT (9)

Artist = Arial Black (11)

Price = Segoe Print (10)

Size = Segeo Print (9)

Media = Segeo Print (9)

We have attached the price tags doc and fonts (these files end in .ttf)that might not be on your computer. If you copy them into your font folder (Usually found at: C:\windows\fonts) they might show up when you open the document. If not you will receive a message that some items have been converted.

Thanks

Robert & Dave
